1 INTRODUCTION

Welcome to the official whitepaper of Terea, a pioneering initiative in the realm of cryptocurrency dedicated to elevating security standards within the industry. In an age where digital assets are becoming increasingly prevalent, ensuring the safety and protection of user assets and data has never been more crucial.

Terea is driven by a singular vision: to establish a robust and secure platform that empowers users to engage in the world of cryptocurrency with confidence and peace of mind. Through innovative technologies, rigorous security protocols, and a steadfast commitment to transparency, we aim to redefine industry standards and set a new benchmark for safety in the crypto landscape.

This whitepaper serves as a comprehensive guide to our project, outlining our core principles, innovative solutions, and strategic roadmap. Join us as we embark on a journey to revolutionize the way security is approached in the realm of digital assets, ushering in a new era of trust and reliability for users worldwide.

2 HOW IT ALL STARTED

The idea was first born, when (back in November 2021) team behind **Squid Game** token, scammed its investors for roughly \$3.38million. This token was all over the news with titles such as “***the new Squid Game cryptocurrency had soared by 83,000% over just a few days***”.

The second such token was **Safemoon**, they wiped out billions in market capitalization, withdrew crypto assets worth more than \$200 million from the project, and misappropriated investor funds for personal use.

We can't even mention / don't know how many of other scam tokens launched between / during 2021 bullrun. Millions of dollars were “stolen” during that time. And still are, on daily basis, to this day. The saddest part is, that not one of the exchanges / ICO platforms offered any help for scam victims.

And at this point we knew something had to be done about this. We decided that we will try and change that, in any way we can. This is our VISION

Even though we can't fully prevent scams, but if we can get a scam victim at least 10% (this is the minimum we are aiming for) of his stolen funds back, that's a win in our book

3 PROBLEMS

Some of the current problems in crypto suffer from a number of problems:

1. **SMART CONTRACT / TOKEN CREATION PRICE:**
 - a. With all the hype around crypto investments lately, solidity / smart contract developers became really greedy
 - b. Learning solidity and creating your own smart contract (to avoid paying for smart contract can be quite a long and painful process)

2. **ICO PLATFORMS:**
 - a. The problem we see with some of the ICO launchpads (cannot be named for legal reasons) is that they don't care about their users, and they offer zero protection for user's funds
 - b. Some of the platforms have very high listing / KYC fees
 - c. At the end of the presale they either take a huge portion of the funds raised, or the project tokens itself, and can use / sell those to plummet the price later
 - d. Scammers can list as many tokens as they want without any consequences

4 SOLUTIONS

List of features we are trying to achieve to empower the safety in crypto space:

1. TOKEN CREATOR TOOL

- a. Fully customizable token creator system, for a reasonable price (we don't want to devalue work of developers)

2. AI AUDIT TOOL

- a. Ai auditor tool, with free and premium features. With "updating" feature on function calls

3. ICO LAUNCHPAD

- a. Launchpad for new projects with built-in security features
- b. Warning system, for abandoned projects, possible rug pulls, shady transaction
- c. Checking background, wallet history, ip address..., for any other previous shady action
- d. Integrated safe/ recovery fund, for users that may get scammed along the way.

4. FUNDRAISING

- a. Donation campaigns (similar to GoFundMe), to let other people / projects contribute and help the scam victims

5 TOKENOMICS

1. TOKEN SPECIFICATION

- Name: **Terea**
- Token Symbol: **TER**
- Total Supply: **100.000.000**
- Number of Decimals: **9**
- Blockchain: **BEP20**
- Token Type: **Utility**
- Audit: TBA
- Contract Address: **0x370d042ef3031AC1d4888e49EF9b20369138DCc2**

2. TOKEN ALLOCATION

3. TOKEN FEE STRUCTURE

	Buy / Sell Fee
Liquidity Pool	2%
Marketing	1%
Team	2%
Development	1%
Ecosystem	1%

4. UTILITY

- Once the Phase 3 is completed, and Launchpad goes live, holder of TER token will be able to farm newly listed tokens

6 ROADMAP

1. PHASE 1

- Research and Conceptualization
- Team Formation
- Whitepaper and Tokenomics
- Smart Contract Development and Deployment
- Token Presale

2. PHASE 2

- Public Launch
- Community Engagement
- Marketing Campaigns
- Strategic Partnerships
- Product Development

3. PHASE 3

- Ecosystem Development
- Community Governance
- Global Adoption
- Regulatory Compliance
- Roadmap Update
